Founder, Shoji Nemoto, set up head office at Takagi Takinoiri, Motomiya-machi, Adachi-gun Established Kodai Sangyo Ltd. with capital of 2,800,000 yen Added new head office warehouse facilities

Added new factory at 7 Takagi Takinoiri, Motomiya-machi

PRODUCT GUIDE

Japanese Cypress

Japanese cypress has a very strong vital force and trees that are several hundred years old still exist in natural forests in Japan. In fact, it has been used as timber for building shrines and temples from old times and it is well known that Horyuji Temple, which is said to be 1,300 years old, is made of Japanese cypress. This wood is excellent for controlling humidity and preventing mold, and it has antimicrobial and bactericidal properties. Its fragrance is said to have a relaxing effect as well. Experience life with Japanese cypress — a wood with many good features

ヒノキは樹齢何百年という木もまだ日本の自然林には存在するほど、生命力の強い木です。実際に神社仏閣を建て るための木材として古くから用いられており、建造から1300年経つとされる法隆寺がヒノキで造られていることは 有名です。木材は湿度の調整や防カビ性や抗菌性、殺菌性に力を発揮します。香りはリラックス効果もあると言われ ています。ヒノキにはたくさんの特徴があります。そんなヒノキのある暮らしはいかがですか

The grooved cutting board boasts an innovative design that enables more effective use of the available surface area compared to conventional rectangular cutting boards. The bottom of the board is not round, but cut making it easier to move ingredients around the board and allowing for easy storage. The board also has a smooth surface and a grooved surface so that a different surface can be used with meat/fish and fruit and vegetables etc.

今までにない斬新なデザインですが、従来の長方形のまな 板に比べまな板の上のスペースを有効に使うことができます。また、底の部分を丸のままではなくカットしている為、食 材の移動がしやすく、保管もしやすくなっております。 平らな面と溝付面の2面あるため、肉や魚、野菜など食材に よって使い分けできます。

The board edges have been finished with a layer of lacquer, which has anti-bacterial properties, preventing the black coloration that can occur from prolonged use. Cypress also has anti-bacterial properties maintaining a safe, sanitary cutting surface without the need for chemicals. The boards come in a variety of colors so that you can select a different board depending on the ingredients, cuisine or your mood.

トロに抗菌効果があるうるしを塗布し ている為、長期使用によって発生する黒 ずみを防ぐことができます。また、ひの きにも抗菌成分が含まれており、自然の 成分で安全に清潔にご使用頂けます。 カラーバリエーションが豊富な為、食材 によって、料理によって、気分によって使 い分けることができます。

Material / Japanese cypress

The knife slots in this knife block have been reinforced with walnut, a timber harder than cypress to prevent damage and scratching etc. The block also has a stopper to prevent the knife blade protruding from the block so it can be used safely. Designed to be able to store a variety of knife sizes.

包丁を出し入れする小口部分にひのきよりも硬いウォールナット を使用することにより、小口部分の十天や破損を防止します。また、刃先が飛び出すのを防止するストッパーがついている為、安全にお使い頂けます。包丁の大小に合わせて収納できるようになっております。

Pour hot water at a temperature of 38 to 42°C in the foot spa bucket and soak the area below your knee for an appropriate period of time. This is said to have various effects such as helping you recover from exhaustion and relaxing your mind and body as a result of better blood circulation.

足湯湯おけに38~42℃のお湯を入れ、ひざから下を適度な時間つけます。 血行が見くなることによる疲労回復や心身のリラックスなど、いろいろな効果があると言われています。

シャワー時や体を洗うときなどに 腰をかけて使用します。

Hinoki

Innovative and relaxing cypress air-freshener made from wood shavings and cut-offs. The wood shavings can be hung in the bedroom or car to enjoy the fragrance and can also be reused as mulch around the base of plants around the house. The pellets can be placed directly into the bath, and if you place them in the living room to dry afterwards, they work as a humidifier, retaining moisture in the room. When the pleasant cypress fragrance is gone, you can dry the pellets out and use them to massage your feet and hands or use them as chips around the yard.

リラックス効果のあるひのきの香りを楽しめる芳香剤、加工時に出る、プレナーチップや端材をリユースしています。プレナータイプはベッドルームや車の中などにぶら下げて香りを楽しめ、使用後は橋木の保湿材に再利用可能です。玉のタイプは直接/スタブに入れても使用でき、翌日までの乾燥をリビングで行えば、リビングの保湿効果にもむります。匂いがなくなった後は、乾かして手や足の裏のマッサージや、外の芝生周りのチップの代替にも使用できます。

Comfortable living.

Kodai Sangyo is a general manufacturer of wooden products for the home with a view to "comfort and healing".

DESIGN

The planning and designing of products that are in tune with current trends and meet the needs of the market.

We focus on manufacturing products that harness the texture and subtleness of natural timber and meet the needs of consumers. Product marketing, planning, design, packaging and sales floor testing in our simulation room is all performed independently by Kodai Sangyo.

Marketing

We are committed to pursuing products and features that are in demand based on requests and feedback received from retail outlets and market surveys.

Product planning

Our focus in on products that are fashionable in the eyes of the consumer and satisfy the needs of the market, including racks, tables, benches, bath goods, kitchen goods and individual parts based on solid marketing and creativity.

We embrace the concept of safe, reliable and comfortable design with a distinct focus on attention to detail and quick development.

PRODUCTION MANAGEMENT

Harnessing the knots and grain found only in natural materials to produce high-quality products.

Our focus is on products made from forest thinnings removed to assist the growth of the remaining trees as part of our aim to provide safe timber products that protect the natural environment and can be traced back to the production area. We are committed to the production of products that ensure total satisfaction with absolute craftsmanship and technology to test for quality and our own unique supply and production method.

Factory

Dust collector

Production management

Production is divided into individua processes including drying, cutting turning and grooving.

Inspection, packaging and shipment

Following product inspection, products are packaged for convenient shipping and product appeal as part of our shipping system.

DISTRIBUTION

Absolute product management and a flexible delivery system providing peace of mind and trust.

Our comprehensive inventory and product management system makes sure you get the products you want when you want them to ensure total customer satisfaction.

trusted and respected organization.
